STU-540

The premium eSignature solution

Product Overview

The STU-540 signature pad is Wacom's most advanced and robust premium electronic signature device. It is ideal for high-traffic environments where in-person handwritten electronic signatures are required to confirm transactions, such as at bank teller desks, hotel check-ins, shop purchases or clinic registrations. The 5-inch high-resolution color LCD screen with hardened glass provides an attractive point of sale signing area with a paper-like feel and superb durability. When not in signature mode, it can also be used for displaying advertising, promotions or branding. A broad range of connectivity options ensure maximum deployment flexibility, including multiple alternatives for virtualized desktop environments. Transaction security is supported with advanced encryption built-in.

Key Features & Benefits

- Low maintenance costs thanks to high durability and the patented cordless, batteryfree digital pen
- Biometrically accurate signatures using the digital pen with 1024 levels of pressure sensitivity
- High durability and a natural, paper-like feel enabled by the hardened glass with anti-glare screen treatment
- Secure transactions enabled by stateof-the-art AES256 / RSA2048 encryption
- Support for virtualized environments through the Virtual COM Port (VCP) for compatibility with Citrix XenDesktop and XenApp v6.5 and later
- Customizable key pad and PIN pad enabling input using graphic images or numerals

- Attractive signature rendering through the use of WILL™ (Wacom Ink Layer Language) technology that renders the best and most authentic-looking representation of handwritten electronic signatures
- Enhanced signature traceability through a UID (Unique hardware ID) for identifying the exact signature pad unit used for a particular signature and other inputs
- Straightforward integration of signature pad support into applications through the WILL™ SDK (Software Development Kit) for Signature
- Ability to display promotional material through an upgraded USB protocol and internal image storage that enables ads to be shown at natural speeds with no delays
